

## **CORRECTION**

---

### Correction to: 2020 ACC/AHA Guideline for the Management of Patients With Valvular Heart Disease: A Report of the American College of Cardiology/American Heart Association Joint Committee on Clinical Practice Guidelines

In the article by Otto et al, “2020 ACC/AHA Guideline for the Management of Patients With Valvular Heart Disease: A Report of the American College of Cardiology/American Heart Association Joint Committee on Clinical Practice Guidelines,” which published ahead of print on December 17, 2020, and appeared in the February 2, 2021, issue of the journal (*Circulation*. 2021;143:e72-e227. doi: 10.1161/CIR.0000000000000923), a correction was needed.

On Page e85, in Table 8, the first box under the last column, “Prohibitive Surgical Risk (Any 1 Criterion in This Column),” read “Predicted risk of death or major morbidity (all-cause) >50% at 1 y OR...” This box has been updated to read, “Predicted risk of death or major morbidity (all-cause) >50% at 30 d OR...”

This correction has been made to the current online version of the article, which is available at: <https://www.aha-journals.org/doi/10.1161/CIR.0000000000000923>
